PREFACE.

Our object in placing this catalogue before philatelists collecting United States stamps as a specialty, is the desire to enable them to have constantly at hand a reference list, giving immediately any information wanted in regard to the prolific issues of the postage stamps of our country, and in a manner never before attempted.

As the editor was for a long time an ardent collector of these stamps, and being now a dealer making a specialty of the same, he is of the opinion that he is enabled to give the average value for the stamps mentioned in this little book, and he believes that the greater number of the commoner varieties are obtainable at prices mentioned herein, and some even at a discount, while the prices for rarities will give a fair idea what these gems are worth.

Whilst this book is not published as a price list, but as a reference list, the publishers invite correspondence from collectors who desire to fill up blank spaces in their albums.

St. Louis. 1845. State arms, crowned with numeral of value, name of place above, "Post Office" below.

19	5c black on bluish p.	\$100 00	\$75 00
20	10c black on bluish p.	75 00	60 00

Three types of both values are in existence. The 20c St. Louis, which is said to exist, is doubtful; the plate of the 5c stamp being used to print that stamp after numeral has been erased and now value engraved in its place. But as no proofs can be given of the official issue of the stamp, we have abstained from valuing it. At a recent New York sale it came up with the reserve price of \$500, but remained unsold.

All United States postage stamps, issued after 1861, are good for postage, while those previously issued are obsolete, for reasons of the great quantities on hand in Southern Post Offices at the time of the outbreak of the Civil War. The reprints of these now obsolete stamps are perforated 12, and, therefore, easily distinguished from the originals.
