Control

The Savannah Provisionals

The Savannah stampless provisionals were prepared by handstamping envelopes with stampless markings and then applying a control marking (rosette). The first markings applied were the “PAID” and “5” (E01) and the “PAID” and “10” (E03). These were used from 1 June until about mid-July when the “PAID / 5” (E02) and “PAID / 10” (E04) oval markings began to be used.

The early markings tend to be strung out across the upper half of envelopes because it took two strikes of the stampless markings plus the control to prepare a provisional. The new markings introduced about mid-July are almost always struck in the upper left quadrant and the control in the upper left corner.

NOTE: The inclusion of an item in this census is not a guarantee of authenticity.

Notes

Four Suspicious Savannah Provisional Covers

The two covers to the left received a "No Opinion" from the Civil War Philatelic Authentication Service. The primary reason was the "PAID 10" marking which has a dent in the rim to the left of the "P" of "PAID"

None of the other "PAID / 10" stampless provisional markings have this dent. Also, the control rosette does not have the clarity of the same marking on other stampless provisionals.

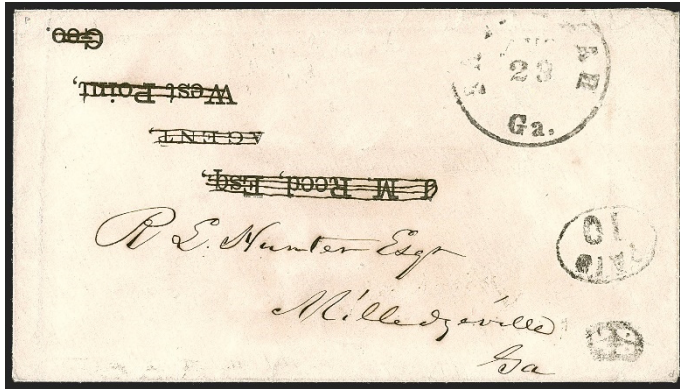

Two other covers with the dent were found (covers below and on next page). Although not mentioned in the opinion there is another problem with three of the covers, the provisional and control marking are at the lower left. All other examples of the provisional have these markings in the upper left quadrant.

Finally, the presence of genuine postmarks on three of the covers can be explained by the use of postmarked covers that passed through the mail without a rate marking or they had stamps or markings removed.

These four covers are not included in the census.
