Greenville C H, Provisional Markings

Type A

Type B

Type C

Greenville C H, Control Markings

The Greenville C H provisionals were prepared by handstamping envelopes with a "PAID" and a "5" or "10" rate marking on the front and a control marking on the reverse.

Greenville C H used three different postmarks as control markings. There is no apparent reason some were dated, and others were not.

WARNING: The same markings were used on stampless covers. Provisionals must have a control (dated or undated) on the reverse.

NOTE: The inclusion of an item in this census is not a guarantee of authenticity.

Notes for the Collector

Provisional Covers

The E01 and E02 markings were also used to prepare stampless covers. The only difference is the provisional covers have a postmark control on the reverse.

Catalog descriptions were carefully reviewed to ensure the covers in this census were described as provisionals. Where the source is "private" owner descriptions are relied upon.

Greenville Postmarks

Greenville used three different postmarks on provisionals. One is a double circle marking and the other two, single circle markings. The two most noticeable differences between the latter are the space between the "G" of "GREENVILLE" and the "S" of "S. C." and the space between the "S" and "C" of "S. C." The illustrations below show the differences.

Double Circle

**Close space between
"G" and "S"**

**Wide space between
"G" and "S"**

Control Markings

Both the double circle and the single circle postmarks were used as controls. Some are dated and others are not. There is no explanation for the difference or the dates. The markings are usually weak, and it is not always possible to determine what single circle postmark was used.

Year Dates

Three 10c covers (CN-007 (10 Oct); CN-012 (10 Nov); and CN-014 (12 Nov 014)) have what appear to be non-contemporary 1864 year docketing on the reverse. Without further proof these covers are considered to have unknown year dates in this census.
