

Census of Memphis, TN, 5c Provisional Covers

Compiled by Francis J. Crown, Jr.

Adhesive

The Memphis 5c Provisional

The 5c Memphis provisional was engraved on wood and reproduced as stereotypes from which the stamps were printed on white wove paper. All were printed in red of various shades. No distinction between shades is noted in this census.

The stamps were printed by M. C. Gallaway, owner of the Memphis *Avalanche* and postmaster.

The 5c Memphis provisional was plated by Thomas H. Pratt about 1929. See 'References in "Notes for the Collector."

Billy Matz prepared a census of the 5c provisional that appeared in the *Confederate Philatelist* in the late 1960s (see 'References' in "Notes"). The Matz censuses and this census contain listings that are not in the other.

Many of the dates on the 5c provisionals are difficult to read. For this reason, this census relies heavily on the dates given in the sources.

NOTE: Every effort is made to ensure the accuracy of the census, but the inclusion of an item is not a guarantee of authenticity.

Notes for the Collector

Fakes

There are many fakes of the 5c Memphis adhesive and entire. The authentic adhesive and entire were both printed from the same electrotype, so the differences noted below apply to both. The fakes are easy to spot. Look for a thick solid line of color between the flag of the “5” and the top outside border of the counter on the “5” (below left). This line is not found on the fakes (below right), though some do have a partial line or solid dot. The line is quite noticeable on the authentic.

Another way to tell a fake is to look at the two diamonds below the “5.” On the genuine the two diamonds almost touch or touch the bottom of the “5.” On the fakes the tops of the diamonds are cut off, greatly distorted, or absent.

Memphis Target Cancel

The four-ring target cancel found on several Memphis provisional covers is a matter of controversy among students of the postal history of Memphis. Some doubt its authenticity and others believe it is authentic. There are only four recorded examples. Two are on 2c provisional covers. One of these covers is in private hands and no image is available. Two are on the 5c provisional. One is on a cover (included in the census) and the other on a block of six, both are illustrated below.

Manuscript “Paid” Markings

Several of the Memphis 5c provisional covers have manuscript “Paid,” “Paid 5,” or “Paid 10” markings. These may have been applied by a postal clerk who later added the stamp to properly rate the letter. Or, they may have been added by the letter writer who sent the letter to the post office by a servant. The servant was expected to have money equal to the rate on the letter(s) when presented at the post office.

Earliest Date of Use

Thomas Pratt (see reference below) quotes a Memphis newspaper notice by Postmaster Gallaway dated 11 July 1861 that stated both stamps and envelopes were available for purchase. This notice may have been printed several days after the stamps went on sale as there is a cover with an 8 July 1861 postmark. This cover considered the earliest date of use.

Over time other covers have appeared which allegedly have an earlier date of use. However, the months in the postmarks are incomplete and illegible.
